Profile

I build and run products end to end — Android & iOS apps with Kotlin Multiplatform, Spring Boot backends, Next.js frontends, and the infrastructure underneath. My software reaches thousands of users every day: 500+ schools across Nepal and India, ski resorts in Europe, and Nepal's first dedicated crowdfunding platform.

Experience

Founder & Full-Stack Engineer, Vardan Soft Pvt Ltd

Mar 2024 - Present | Nepal

Building bolnepage.com through my own company, owning its software architecture and SaaS development end to end.

Co-Founder & Senior Software Engineer, GoDaan

Feb 2024 - Present | Kathmandu, Nepal

Built and now operating Nepal's first dedicated crowdfunding platform, connecting donors directly with verified medical, education, and community causes.

- Built the mobile apps with Kotlin Multiplatform and Jetpack Compose
- Design and operate the Spring Boot + MongoDB backend and Next.js web platform
- Implemented identity-verified campaigns, secure payments, and transparent fund transfers with a full audit trail
- Own the infrastructure end to end: CI/CD, cloud deployments, domains, and email

Android Developer, CommuniSki Ltd

Dec 2022 - Jul 2024 | Remote

Built Europe's top-rated ski resort app, engineered to work fully offline in extreme mountain conditions.

- 65% code reuse via Kotlin Multiplatform while keeping a fully native UX
- Offline-first architecture: complete app functionality with zero connectivity
- 30% longer battery life in sub-zero temperatures through performance optimization

Android Developer, Sajilo - Nepali Ride Sharing App

Feb 2023 - Dec 2023 | Kathmandu, Nepal

Launched driver and passenger apps for Nepal's fastest-growing ride-sharing platform in 6 months, scaling to thousands of daily users.

- Smart matching algorithm that reduced passenger wait times
- Offline mode for uninterrupted service in low-connectivity areas
- Secure payment flow handling bulk daily transactions

Android Developer, Dynamic Technosoft

Jan 2021 - Jun 2023 | Kathmandu, Nepal

Scaled education tech to 500+ schools in Nepal and India by architecting a modular app system built from a single codebase.

- 500+ customized school apps generated from one core platform
- CI/CD pipeline that cut release cycles from days to hours
- Mentored junior developers into senior roles, boosting team output

Android Developer, APPLYJOB.COM

Dec 2021 - Nov 2022 | Kathmandu, Nepal

Transformed Nepal's #2 job-search app through a UX redesign and performance work that lifted engagement and placements.

- Faster app loading through an optimized data architecture
- Smarter job matching that increased successful hires
- Notification strategy that kept users active and engaged

Education

Bachelor of Computer Application, Tribhuvan University, Ambition College

2022 - Present | Kathmandu, Nepal

Completing my BCA while working full-time — bringing real-world engineering into my studies and theory back into my work.

Skills

Mobile apps: Kotlin Multiplatform, Compose Multiplatform, Jetpack Compose, Coroutines, Hilt

Backend & APIs: Kotlin, Spring Boot, Ktor, Serverless, MongoDB, MySQL, OAuth2

Web: Next.js, React, TypeScript, Tailwind CSS

Infrastructure: Docker, GitHub Actions CI/CD, Google Cloud, DNS & domains, Email delivery
